LIST OF CONTENTS

FACULTY DEVELOPMENT PROGRAMME FOR

A.Y 2023-2024

S.NO	NAME OF THE TOPIC	DATE
1	Utilization of instrumental techniques in drug & development	22-04-2024 TO 27-04-2024
2	Exploring new innovations in novel drug delivery system	02-01-2024 TO 06-01-2024
3	Advances in pharmacology and pharmacy	13-11-2023 TO 18-11-2023
4	Recent advances in drug delivery systems	25-09-2023 TO 30-09-2023
5	Non- Teaching Training on pharmacology equipment	02-05-2024 TO 04-05-2024

Nimra College of Pharmacy

Estd By : Nimra Educational Society (A Muslim Minority Society)
Approved by Pharmacy Council of India (PCI), New Delhi.
Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.
An ISO 9001: 2015 Certified institution
E-mail : principalncp@yahoo.in Website : www.nimra.in

Date:16-04-2024

CIRCULAR

This is to inform all the faculty members that Department of Analysis is organizing, A one week faculty development program on “**Utilization of Instrumental techniques in drug and development**” from **22-04-2024 - 27-04-2024**. All of you are requested to attend the program.

Objective of FDP

- For indispensable quality control throughout drug development and production.
- For qualitative and quantitative analysis.
- Used in checking the quality of raw materials.
- Instrumental analysis investigates the use of scientific instruments to study systems.

Outcome of FDP

- Confirms the presence and concentration of active pharmaceutical ingredients (APIs)
- That allows looking at things from a different perspective, regardless of whether you are developing a new product.
- The pharmaceutical industry relies on Instrumental Analysis to maintain the purity, efficacy, and safety of drugs

Conclusion : One week faculty development program was concluded on 27-04-2024 with plenty of learning & experience for the participants.

Total no of participants: 25

(APPROVED BY AICTE, PCI, NEW DELHI
&
AFFILIATED TO JNTUK, KAKINADA)

ABOUT THE TOPIC

"Utilization of instrumental techniques in drug development" encompasses the application of various analytical and experimental methods to advance pharmaceutical research, formulation, and quality control processes. These techniques play a crucial role in ensuring the safety, efficacy, and stability of drugs from initial discovery through to commercialization and beyond.

Moreover, instrumental techniques are pivotal in quality control and assurance throughout drug manufacturing processes. Techniques like X-ray diffraction (XRD) and thermal analysis (e.g., differential scanning calorimetry, DSC) are employed to assess crystal structures, polymorphism, and physical properties of drug substances and formulations. These analyses ensure consistency and compliance with regulatory standards, validating the safety and efficacy of pharmaceutical products before they reach patients.

A FACULTY DEVELOPMENT PROGRAM ON UTILIZATION OF INSTRUMENTAL TECHNIQUES IN DRUG AND DEVELOPMENT

Dates:

22-04-2024 to 27-04-2024

Organized By:

Department of Analysis

Venue:

Seminar Hall

Objective of FDP

- To accelerate systemic drug delivery to the specific target site.
- Maximizing therapeutic efficacy and minimizing off-target accumulation in the body.
- This endeavor is not merely a scientific pursuit; it holds profound implications for global health.
- The ability to deliver a drug more selectively to a specific site; easier, more accurate.
- Less frequent dosing; decreased variability in systemic drug concentrations.
- Absorption that is more consistent with the site and mechanism of action.

Outcome of FDP

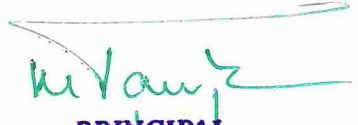

- Innovation enables problem-solving and provides creative insight.
- That allows looking at things from a different perspective, regardless of whether you are developing a new product.

Conclusion : A five days faculty development program was concluded on 06-01-2024 with plenty of learning & experience for the participants.

Nimra College of Pharmacy

Estd By : Nimra Educational Society (A Muslim Minority Society)
Approved by Pharmacy Council of India (PCI), New Delhi.
Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.
E-mail : principalncp@yahoo.in Website : www.nimra.in

Objective of FDP

1. Improve human health outcomes through the development of new.
2. Enhance the safety and efficacy of existing medications.
3. Develop personalized medicine approaches to optimize treatment.
4. Improve the quality of life for patients with chronic diseases.

Outcome of FDP

- Increased effectiveness of treatments for various diseases..
- Streamlined drug development and approval processes.
- Reduced healthcare costs through cost-effective treatments.
- Personalized medicine approaches for optimized treatment.
- Discovery of new drug targets and mechanisms of action

Conclusion : A one week FDP concluded on 18-11-2023 with plenty of learning & experience for the participants who were faculties from different institutions across the Andhra pradesh.

Total no of participants: 20

About College

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

About the Topic

Advances in pharmacology and pharmacy are transforming the way we approach healthcare.

With the rapid progression of research and technology, we're seeing significant improvements in drug development, disease treatment, and patient care. Recent Developments in Pharmacology- Personalized Medicine: Pharmacogenomics and pharmacogenetics are enabling tailored treatment plans based on individual genetic profiles. Targeted Therapies: Advances in molecular biology and biotechnology have led to the development of targeted therapies, such as monoclonal antibodies and gene therapies.

Nanotechnology: Researchers are exploring the use of nanoparticles to improve drug delivery, reduce side effects, and enhance treatment outcomes. Advances in Pharmacy Practice- Clinical Pharmacy Services: Pharmacists are playing a more prominent role in patient care,

Objective of FDP

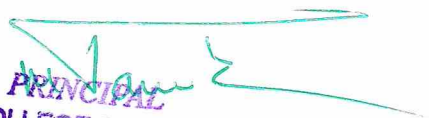

- Polymeric Drug Delivery Systems.
- Nanotechnology-Based Systems.
- 3D Printing Technology: This technology allows for the creation of personalized drug delivery devices and implants, enabling precise dosing and targeted therapy.
- Molecularly Imprinted Polymers: These polymers are designed to recognize and bind specific molecules, allowing for targeted drug delivery

Outcome of FDP

- Enhanced Research Capabilities.
- Improved Teaching Methods.
- Collaborative Opportunities.
- Innovation in Drug Delivery.

About the Topic

Recent advances in drug delivery systems have transformed the way we approach healthcare. One of the most significant developments is the use of Red Blood Cell Membrane-Camouflaged Nanoparticles.

These nanoparticles are coated with red blood cell membranes, allowing them to mimic the behavior of red blood cells and evade the immune system. This technology has shown great promise in delivering drugs to specific targets, such as cancer cells, while minimizing side effects¹. Another exciting area of research is Hyaluronic Acid-Based Drug Nanocarriers. Hyaluronic acid is a naturally occurring polymer that can be used to create nanoparticles that target specific cells, such as cancer cells. These nanoparticles have shown improved drug delivery, increased therapeutic efficacy, and reduced side effects
